SOFTWARE DEVELOPER

ABOUT ME

I am a Software Developer with a BSc in Computer Science and over 10 years of experience in designing, developing and maintaining software solutions, primarily within e-commerce and cybersecurity.

Throughout my career, I have been involved in technical decision-making, coordinating development work and taking responsibility for seeing projects through to completion. I work well both independently and as part of a team, and value clear communication, collaboration and a solution-oriented approach.

I have a strong interest in technology and continuously seek opportunities to develop my knowledge and skills.

WORK EXPERIENCE

2024–Present — **Software Developer** · Aftra

- Part of the development team building Aftra's attack surface management platform, helping organizations identify and monitor their external exposure.
- Contributed to the frontend architecture and development of core components.
- Led the integration of AwareGO's security awareness training into the Aftra platform, with over 4,000 users completing training within the first month.

2022–2024 — **Software Developer** · Syndis

- Worked on the early development of Aftra's attack surface management platform, which initially started as a project within Syndis.

2018–2022 — **Senior Software Developer** · Advania

- Developed and maintained e-commerce solutions for major Icelandic companies.
- Worked directly with clients to understand business requirements and develop tailored technical solutions.
- Worked alongside project managers to coordinate development work, including task planning and prioritization.
- Played a major role in complex integrations and custom functionality, including combining S4S's separate webstores into one shared shopping cart so customers could browse and buy across brands in a single checkout.

2016–2018 — **Junior Software Developer** · Advania

Developed new features and maintained a variety of websites using HTML, CSS, JavaScript, XSLT and C#.

PERSONAL

Family. I live with my partner, Sigrún Gunnarsdóttir, who works as an Account Manager at Landsnet. Together, we have two children, Lára (born in 2021) and Gunnar Óliver (born in 2026).

Interests & Hobbies. I have a background in competitive swimming, having trained for 13 years and represented Iceland on the national team. I enjoy running, climbing and Brazilian jiu-jitsu, and have recently taken up golf. I also enjoy gaming in my spare time.

RECOMMENDATIONS

Available upon request

EARLIER EXPERIENCE

Teaching Assistant
Reykjavik University · Dec 2015
Three-week seminar for first-year students, focused on building a full-fledged MVC application.

Teaching Assistant
Reykjavik University · Jan–May 2015
Graded projects for Web Development II, an advanced web development course focused on front-end development.

Pavement Worker
Hlaðbær Colas · 2012–2016
Summer job in road paving, including setting up roadblocks and paving roads.

Assistant Tour Guide
Ultima Thule · 2010–2016
Part-time position as an assistant tour guide, ranging from long camping trips to daily cave tours.

NOTABLE PROJECTS

Aftra — Attack Surface Management Platform aftra.io
Contributed to the frontend architecture and development of Aftra's platform, including technical design decisions, technology selection, implementation and code reviews.

AwareGO Integration
Led the integration of AwareGO's security awareness training as a new feature within the Aftra platform, with over 4,000 users completing training in the first month.

S4S
s4s.is
Played a key role in developing a shared shopping cart connecting three separate webstores, allowing customers to purchase products from different brands in a single checkout.

Advania Vefverslun
vefverslun.advania.is
Developed the original DynamicWeb version of Advania's webstore, migrating it from LiSA. It was the first Icelandic webstore built on DynamicWeb.

Arion banki
arionbanki.is
Contributed to the development of Iceland's first online loan affordability assessment, allowing customers to complete the process online in minutes.

Ölgerðin & Danól
vefverslun.olgerdin.is
Developed B2B webstores for Ölgerðin and Danól using DynamicWeb as part of the Advania team, enabling business customers to place orders online.

BYKO
byko.is
Contributed to the development of BYKO's webstore as part of the Advania team, supporting the company's expansion into online sales.

SIDE PROJECTS

Framtíðarsýn — Full-Stack Web Development & E-commerce framtidarsyn.is
Designed, built and maintain an educational publishing website combining online book sales with a resource portal for teachers. Built with Nuxt 4, Vue 3, TypeScript, Tailwind CSS and Supabase, deployed on Vercel.

ShiftPilot — UI/UX Design & Full-Stack Development Confidential client
Currently designing and developing a staff scheduling platform for a client who has previously managed shifts using spreadsheets. The platform includes a Claude-powered AI assistant that helps create shift schedules and find staff to cover shifts.

DoughCraft doughcraft.cc
Designed the UI/UX and built the frontend of a dough calculator and recipe platform, developed with two friends. Built with Expo and React Native Web.

EDUCATION

2013–2016 — **Reykjavík University**
BSc Computer Science with a grade of 8.1/10

2012–2013 — **University of Iceland**
Completed coursework in pharmaceutical sciences and biology before pursuing Computer Science.

2008–2012 — **Flensborg**
High school / junior college with a focus on biology.
